Re: Westland Construction Ltd.

Westland Construction has been contracted by the Royal Canadian Mint to perform various work throughout our facility ranging from office renovations/additions to exterior concrete pad installations.

The work performed by Westland was conducted professionally, completed with a high level of quality with attention to detail and progressed well according to my requirements.

Additions to the scope of work were done on a time and materials basis and were always priced fairly. Deviations from the scope were facilitated amicably. Subcontractors were managed well. All levels ranging from the project supervisor to the site supervisor and crew were a pleasure to work with, all being polite, good-humored, able to listen to instruction and most importantly, their word could be trusted.

When it comes to service providers, I require three things: Excellence, Integrity and Being on Time. Westland possesses all three. They went above and beyond that which I asked of them. I am currently working with Westland Construction on additional office projects and intend to continue my relationship with them in the future.

Best Regards,

Randy Froese
