Re: Testimonial & Recommendation of Services**

To whom it may concern,

f-BLOK was pleased to work through an interior multipurpose room renovation at Riverview Community Centre [RVCC] with Westland Construction's team of professionals.

With grant funding limited, and extensive repairs required, Westland was instrumental in advising and assisting the Design and Ownership Team in maintaining the functionality and aesthetic goals of the project to re-align with available funds. Their estimating department displayed continued commitment over the course of 10 months post tender, and provided crucial cost/value insight until the project scope was finalized that matched available funding.

Right out of the gates their assigned project manager and site supervisor displayed a strong understanding of the project's goals and intent, identified potential project risks inclusive of mitigation strategies, and laid out a straightforward and realistic work schedule.

Upon discovery of unforeseen items, Westland's team consistently came to the table with possible solutions to assist and review with the Design team which allowed us to confidently respond and provide the necessary instruction(s).

It is without hesitation, that f-BLOK would highly recommend Westland Construction for any construction works.

Sincerely,
f-BLOK architecture inc
